

First Card add-on: Expense Management

Reduce administration with direct loads to your existing expense management system

The Expense Management solution integrates seamlessly with most major systems on the market. Benefits to your company include:

Faster and more accurate expense reporting using automated data feeds

Both your company and your cardholders can save time and avoid errors when you replace manual entry of transactions with automated data feeds from First Card directly to your existing expense management system.

Flexibility to use the expense management system that works best for your company

Since First Card integrates with most major systems, you have the flexibility to continue using your existing system or to try a different one whenever you choose. The supported systems include Acubiz, Agda, Basware, Dicom Expense, Flex Reseräkning, Expenture, Hogia, Mobil Expense, Oracle, SAP, Visma and many more.

Dedicated customer service to help reduce administration

Our customer service is dedicated to our First Card customers. So if you need assistance with automated data feeds or any other account feature, you can talk directly with a person who has solid knowledge of the First Card payment solution.
