

First Card add-on: Travel Account

Simplify travel and control costs with the First Card Travel Account

When you add the Travel Account option, you will gain an integrated invoicing solution that works with any major travel agency and helps ensure travel policy compliance. Benefits to your company include:

Reduced administration with one account covering all company travel expenses

Travel Account simplifies administration by gathering travel-related expenses for the entire company on a single invoice. This solution covers all employees with or without a card and can also be used for travel by consultants, guests and for group travel — so you get a more complete picture of your company's travel spend, plus fewer invoices which reduces the work of accounts payable.

Reports that make it easier to monitor spending and negotiate discounts with preferred providers

Online access to helpful reports let you examine spending for key expense categories including flights, hotels, trains, car rentals, and restaurants. These reports make it easier to monitor compliance with your company's travel policies and can also be useful in supporting discount negotiations with your preferred travel providers.

Flexibility to integrate with your existing systems using the travel providers of your choice

The Travel Account solution works with all major business travel agencies and other leading providers such as SJ and SAS. It can also be used for self-booking within the guidelines of your company travel policies.

Increased convenience, security and confidence for your business travelers

Using the Travel Account solution simplifies expense reporting for your travelers while providing them with the added confidence of a Mastercard® that offers unsurpassed acceptance at more than 39 million places worldwide. Travelers are also protected with the travel insurance that covers accidents, trip cancellations, missed departures, luggage delays and more — all at no extra cost to your company.
